

Renal Failure

a Third Leading Cause of Death in Dogs

Highest in >8 years (33 %)

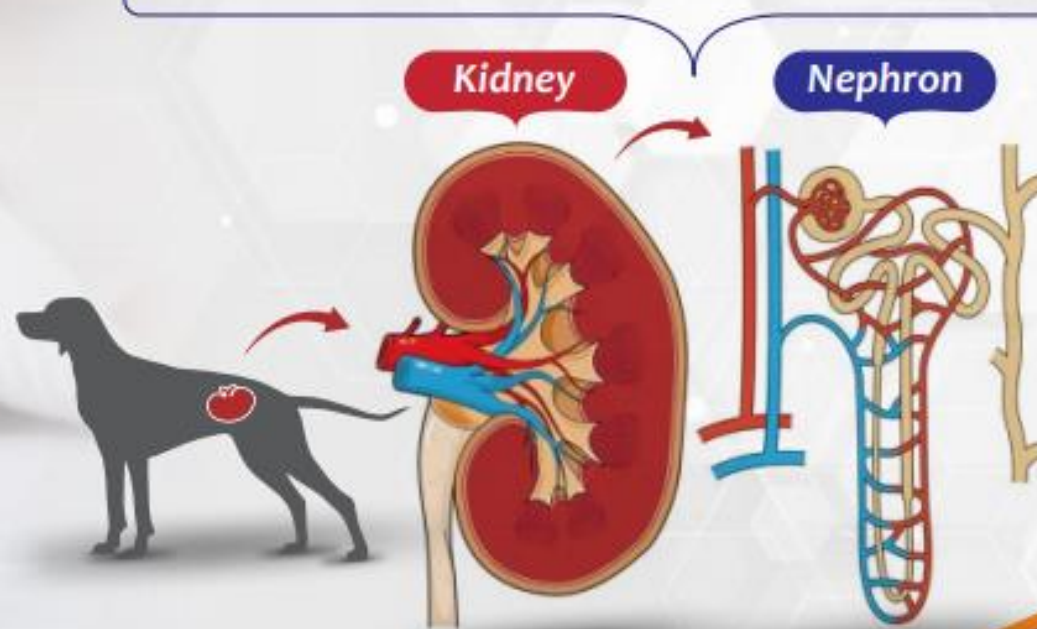

In time at least 1 in **3 cats** and **10 dogs** will
develop some form of kidney disease in their lifetime

Chronic Kidney

- 🐕 Most common kidney-based disease
- 🐕 Waste products are normally filtered out of the blood by the kidneys and excreted in the urine, but dogs with CKD will end up with an accumulation of these waste products in the bloodstream as the filtering process breaks down

Comprehensive management approach for CKD

Promoting Fluid Intake

- ✓ **Maintain hydration** supports kidney function by Elimination of toxins & waste
- ✓ **Dilute urine:** Reduces the risk of urinary complications (crystals & stones).

Medication

- ✓ **Veterinary care** helps to Control Pain, Reduce Inflammation, Fight Infections, Regulate Bodily Functions

Dietary changes

- ✓ **Manage weight,** Support organ function, Improve digestion, Correct nutritional deficiencies or sensitivities. Helps to eliminate toxins and waste

Introducing...

ReliProvTM

Unique Pre and Probiotic combination
with Vitamin K2-7

3 Blister
Strips of
10 capsules
each

Each Capsule contains:

Lactobacillus acidophilus, *Bifidobacterium longum*

Streptococcus thermophilus, *Bacillus subtilis*

Probiotic Blend : 24.5 Billion CFU

Fructo- oligosaccharides (FOS) : 100 mg

Vitamin K2-7 : 50 mcg

For oral administration only

Recommended in Dogs and Cats, 1-2 capsules twice daily along with food

Proactive Approach for Kidney Health

ReliProvTM

Fructo - oligosaccharides (FOS)

- 🐾 Improve gut health by acting as a food source for beneficial bacteria.
- 🐾 Helps to reduce inflammation in the body.
- 🐾 Helps to lower blood pressure.
- 🐾 Helps to slow down the progression of CKD.
- 🐾 Helps to reduce the risk of urinary tract infections.

Proactive Approach for Kidney Health

***Lactobacillus
acidophilus***

Helps to reduce concentration of toxins (diethylamine, nitrosamines etc.) in the blood stream and helps to prevent growth of pathogenic bacteria in the small intestine.

***Bifidobacterium
longum***

longum - Helps to reduce various phenolic and indole metabolic toxin

Bacillus subtilis

Helps to produce lipopeptides which supports in decrease of the creatinine and urea levels.

***Streptococcus
thermophilus***

Helps to reduce plasma levels of BUN (Blood Urea Nitrogen), Uric acid, p-cresol.
