Each ml contains:
Fipronil : 9.8% w/v
S-Methoprene : 8.8% w/v
Excipients : q.s.

FiproRel™ S is an effective, convenient, long acting and fast acting spot on treatment for control of fleas, ticks and biting lice in dogs for 2-10 kg body weight.

Indication and benefit:

- Kills all flea stages (Adult fleas, eggs, larvae, pupae) from developing even in the surroundings for at least 1 month.
- Kills fleas, which may cause flea allergy dermatitis.
- Kills all stages of different ticks and prevents them.
- Rapidly eliminates infestations with biting lice.
- Aids in control of sarcoptic mange infestations.

For External Use Only.
For Veterinary Use.
Not For Human Use.
For Treatment of Dogs Only.

Storage:
Store below 25°C and protect from heat and direct sunlight.

Container Disposal:
Securely wrap pipette in several layers of newspaper and discard in trash.

Caution: To be sold by retail with the prescription of Registered Veterinary Practitioner only.
